

VEHICLE LICENSE PLATE COVER

ABSTRACT OF THE DISCLOSURE

[0032] A license plate cover has a transparent plastic frame and an elastomeric gasket. The frame includes a periphery and an inner side for disposal adjacent to a license plate. The elastomeric gasket is disposed on the inner side near the periphery of the frame. The gasket includes first and second elongate compression ribs which protrude inwardly from the inner side of the frame to different degrees thereby forming a surface that receives a beveled license plate. The elastomer making up the gasket may be furnished with a colorant such that a colored peripheral band is visible through the frame from the front.
